

WAT SERIES TWA 1000-E Electric Taper

As the Market Leader for Water-Activated Carton-Sealing Tape, Intertape's commitment continues with the introduction of state-of-the-art tabletop dispensers.

This superior line of dispensers offer improved features and benefits enhancing the value created by an integrated system of closure material and dispenser. The increased capabilities highlighted in the TWA 1000-E Electric Taper provides the quality your production requires.

The TWA 1000-E Electric Taper completes itself with the most comprehensive package of features found in the industry. Enhanced details within the TWA 1000-E are twin programmable and continuous tape lengths while standards include a user friendly, intuitive control panel, "arching" guillotine style cutter, and 1000' long roll capabilities.

When you compare features, benefits and value, the right choice is Intertape's WAT SERIES TWA 1000-E Electric Taper.

TWA 1000-E Electric Taper Features

- Specifically designed to process "extra wide" IPG DTE Double Tamper Evident Tape
- Standard 1000' roll capacity to reduce downtime from frequent roll changes
- Stainless steel "arching" guillotine cutter for the cleanest cutting action
- 30 standard programmed cut lengths from 4" to 90"
- Twin programmable repeat lengths provide simplicity when "H" sealing or 6 strip sealing
- Continuous dispensing mode feature for extra long case lengths
- Self-centering tape roll side guides are instantly adjustable from 1" to 3½"
- Tank heater warms the water – not the tape – for proper activation of adhesive
- Drip-resistant 60oz water bottle
- Available "auto dispense" photoeye improves productivity and ergonomics

30 presets with twin repeat and infinite length buttons
